

i2 TEXTCHART COURSE OVERVIEW

Duration

1 day

Who Should Attend?

Data Analysts, Investigators and Users of i2 Analyst Notebook and i2 TextChart.

Overview

i2 TextChart helps users identify the who, what, when, where, and sentiment in unstructured content in almost any language and quickly transforms it into structured analysis-ready data. Important details can easily be overlooked, and key connections are difficult to track across multiple documents. i2 TextChart enables new insights by exploiting unstructured data to enhance and expedite analysis.

An interactive course using a combination of lectures, hands-on work and exercises.

Objectives

By the end of the course, you will be able to:

- Improve time to value by deriving new insights in a fraction of the time
- Text extraction and visualisation
- Eliminate the need to read documents
- Import documents
- Eliminate the need to create entities, links, and properties
- Easily exploit large volumes of unstructured data
- Avoid manual cross-checking by automatically matching entities across documents
- Extract real-world objects, their relationships and underlying sentiment

Course Pre-requisites

- You **must** have completed the full 5-day Analyst's Notebook course within the past 5 years.
- You **must** be familiar with using Microsoft Windows.
- An understanding of the concepts and use of visual investigative techniques and how they will help you in your current job is advantageous.
